ABOUT ME

Passionate and multi-disciplinary Game Developer, Technical Designer, and 3D Artist with hands-on experience building immersive virtual environments, endless runners, and interactive web tools. Adept at bridging the gap between programming and art using Unity, Unreal Engine 5, and Blender, with a strong focus on gameplay systems, user engagement, and visual fidelity. Eager to contribute to a creative game development team and grow as a professional game developer and designer.

EDUCATION

VIT BHOPAL UNIVERSITY

B.Tech Computer Science with Gaming Technology

GRADE: 8.08 CGPA

DAV PUBLIC SCHOOL Chirimiri

Stream – PCM

MARIAS HIGHER SECONDARY SCHOOL

Secondary Study

PROJECTS

Endless Survivors - The Forest God (Unity-based Game)

Platform: PC / Android

Tools: Unity, C# | Role: Sole Developer (Game Design, Programming, UI, Testing)

- Designed and developed dynamic endless runner mechanics as a solo indie project with custom player movement and collectible scripting.

The Royal King (Unity-based Game)

Platform: PC / Android

Tools: Unity, C# | Role: Lead Game Developer & Technical Designer (Personal Project)

- Engineered custom chunk spawner algorithms, collectible scripts, player inputs, and low-poly graphics optimization over 3 months.
- Handled overall environment design and sound production for an immersive endless runner experience.

VR – Campus Tour (Unreal Engine 5)

Type: Virtual Reality

Role: Game Developer, Designer, 3D Artist (Academic Group Project)

- Built a high-fidelity 3D model of the VIT Bhopal campus featuring realistic lighting and interactive spatial scripting for immersive VR experiences.

360 Virtual Campus Tour & LittleBits

Type: Website / Web Interactive

Role: Frontend Developer (HTML, CSS, JavaScript, Figma)

- Developed a digital campus hub and web-based 360-degree virtual tour to manage student involvement and enable seamless exploration.

SKILLS

Programming Languages: Python (Pipeline Automation, Utility Tools), C++, C#, C++ Data Structures and OOPs.

Website Development: HTML, CSS, JavaScript, UI/UX Layouts (Figma).

Game Development: Unreal Engine 5, Unity, Blueprint Scripting, VR/AR, Niagara VFX, Metahuman.

Game Design & Art: 3D Modelling, Animation, Rigging, Blendshapes, Asset Sculpting, Camera Staging.

CERTIFICATIONS

- Udemy:** Film Animation and Camera (Unreal), Modeling in Unreal Engine 5, Complete C# Unity 3D Game Development.
- Coursera:** Introduction to AR/VR/MR/XR.
- Vidyardhi:** Python Programming, AIML, Open Source.
